

# World-class content management meets world-class translation management

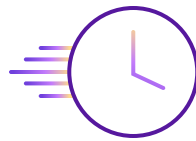

Smartling integrates directly with your Sitecore Experience Platform (XP) instance and workflow so that you don't have to leave a familiar environment to deploy content in any language.

### Improve performance

65% of customers prefer content in their native language. Surprise and delight audiences around the world with multilingual, cross-channel experiences.

### Increase speed

Accelerate time to market and eliminate 90% of manual work by automating content ingestion through Smartling's Connector for Sitecore Experience Platform (XP).

### Translate effortlessly

Smartling has all the essential features for translation and review. In-context review, customizable workflows, and translation memory enhance quality and alleviate the review workload.

## Smartling is trusted by

## Integration features

### Supported content types

Smartling's Connector for Sitecore Experience Platform (XP) supports page and field-level translation of Sitecore content.

### Simplified Requests

The installed connector streamlines single or bulk requests, includes related content items, and auto-authorization of Smartling jobs.

### Real-time status

Get translation progress for the content without leaving Sitecore and automate translation downloads.

### Flexible Sitecore config

Smartling provides advanced translation retrieval types and seamless integration into existing Sitecore workflows.

### Contextual translation and review

Smartling has all the essential features needed for translation and review, including in-context CAT tool experiences and in-platform issues management.

### Optimized translation workflows

Sitecore Experience Platform (XP) users can customize their translation mix for quality and cost by choosing from human, AI, and machine translation options.

## See it in action
