

# Translate Sitecore XM Cloud content faster with Smartling

Keep your tech stack and just add translation. Smartling makes it easy to build delightful multilingual experiences everywhere your content lives.

### Translate more content with automated workflows

Streamline bulk localization at the page or field level with automated push/pull of content between Sitecore and Smartling, plus real-time cost estimates and instant job authorization.

### Keep all of your content up-to-date, stress-free

Smartling detects changes to previously translated documents and automates resubmission to Smartling for translation—so you can be confident your content is always up to date.

### Keep everything on track with real-time visibility

Stay organized and track the progress of every translation. Robust content filters and clear status updates ensure you're always informed.

# Integration features

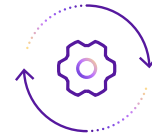

## Flexible translation management

Streamline translation of single or bulk pages, as well as page components and related assets.

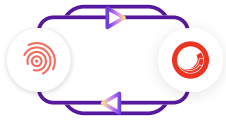

## Simplified requests

Simplify translation requests: set up auto-authorization for jobs in just a few clicks, and easily add related content items.

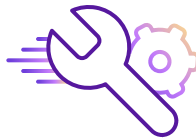

## Automated resubmission

Smartling detects changes to previously translated source content and automates resubmission to Smartling for translation.

## Optimized translation workflows

Smartling provides advanced translation retrieval types and seamless integration into existing Sitecore workflows.

## Fast setup

Set up and configure the integration in just a few simple steps with support from Smartling's dedicated implementation and customer success teams.

## Advanced filtering and status

Stay organized and monitor the progress of every translation with robust content filtering and clear status updates.

## See it in action

Watch this video or book a demo to learn how the Smartling Connector for Sitecore XM Cloud can help you build connections with your global customers.
