

Flex Accelerator

Low-to-no-code Sitecore Development for Marketers. A faster and better way to build your Sitecore site, with fully responsive pages in a simple and intuitive drag and drop interface, all while needing little to no developer time and interaction.

Flex as an accelerator achieves remarkable savings, efficiencies and is enjoyable to use for those who build and maintain Sitecore sites.

As a full-service cloud offering, Flex reduces expensive infrastructure requirements and headaches. All while taking advantage of reusable components, layouts, and vertical-specific themes to personalize experiences.

4x

Faster time to market
